---

Good morning Denise,

Attach you will find a copy of the "Certificado de Entrega de Solar" document sign by me on behalf of EPA. During my conversation with Hector Mercado from PRIDCO he informed me that they will enter the facility to weld the building doors and in the near future to fix the fence. I told him that since we will be accountable for the parking/driveway of the property we should be inform of any subcontractors that they take to the lot while we are not there. Also, that we had contacted the police department and had asked the next door security to inform us of any unauthorized activity as such we should be informed before hand to avoid any misunderstandings.

Gracias,

Frances Delano, P.G.
